

**MARKER
ITALIA S.R.L.**
Sandjet marking systems for glass

A 98-3

Sand jet marking
pistol with tank

FEATURES:

Possibility to mark logos, brands, decorations, etc.

Permanent marking on plain surfaces

Rapidity of execution (1 second)

Absolute convenience of the system and a practically non existent maintenance

Absolute precision with lines up to 0,05 mm

Does not produce pollution

Does not produce noises

Technical characteristics:

Feeding: compressed air 6 - 8 Atm

Weight: 5 Kg

Consumption material: Aluminium Oxide

Dimension: 23 x 23 x 40 h cm + pistol

Optional extra:

Electric exhauster

Ability to mark logos up to 25 mm of diameter.

HOW DOES IT WORK

The machine is supplied ready for any type of marking.

1. pour the sand into the appropriate tank
2. connect the compressed air tube to the marking pistol
3. place the marking pistol against the glass or against the object to be marked
4. keep the trigger pushed for 1 - 2 seconds.

At this point the marking is done and the excess sand is sucked back into the tank.
