

**MARKER
ITALIA S.R.L.**
Sandjet marking systems for glass

B 99-6

Professional sand jet
worktable marker

FEATURES:

Possibility to mark logos, brands, decorations etc.

Permanent marking on plain surfaces

Rapidity of execution (1 second)

Absolute convenience of the system and a practically non existent maintenance

Absolute precision with lines up to 0,05 mm

Counter in a shockproof rubber

Does not produce pollution

Does not produce noises

Technical characteristics:

Feeding: compressed air 6 - 8 Atm and 220V electric current

Weight: 90 Kg

Consumption material: Aluminium Oxide

Dimensions: 80 x 70 x 85 h cm

Optional extra:

Electric exhauster

***Ability to mark logos up to \varnothing 25 mm (standard)
and 25 x 50 mm (with accessories).***

HOW DOES IT WORK

The machine is supplied ready for any type of marking

1. pour the sand into the tank underneath the work counter
2. connect the machine to the compressed air system and to the electric socket
3. adjust the timer for the correct duration of the marking
4. turn on the exhaust motor
5. place the glass to be marked against the stencil
6. push the pedal that actions the marking system

At this point the marking is done and any leftover sand is sucked up from the stencil and from the work counter.
